21.3 The object world of the worksheet component

21.3.1 The dialog guide object \texttt{DialogGuide} \\
21.3.2 The user model object \texttt{UserModel} \\
21.3.3 The presentation layer object \texttt{Presentation} \\
21.3.4 The calculation tree object \texttt{CalcTree} \\
21.3.5 The calculation element base class \texttt{CalcElement} \\
21.3.6 The calculation element iterator object \texttt{CalcIterator} \\
21.3.7 The formula object \texttt{Formula} \\
21.3.8 The subterm selector object \texttt{TermSelector} \\
21.3.9 The tactic object \texttt{Tactic} \\
21.3.10 The assumption object \\
21.3.11 The error class object \\
21.3.12 The problem specification object \texttt{ModSpec} \\
21.3.13 The menu object \\
21.3.14 The worksheet highlight object

21.4 Interactions of the worksheet component with the outside world

21.4.1 Communication between WPL and WDG \\
21.4.2 Communication with the Mathematcs Engine \\
21.4.3 Communication with the Knowledge Browser \\
21.4.4 Draft for an interaction diagram

22 The knowledge browsers - Introduction

22.1 Browser Servlet \\
22.1.1 request a page \\
22.1.2 Information encoder \\
22.2 Information processor \\
22.3 drowser-dialog

23 KEStore

23.1 KEObject

24 The Dialog

24.1 create a new session

V Interaction diagrams

25 Enter an \texttt{ISAC} site

25.0.1 Startup of the server processes \\
25.0.2 A subscribed student enters \texttt{ISAC} \\
25.0.3 A subscribed student calls \texttt{ISAC}
26 Do math on the worksheet

26.0.4 The student starts a calculation . . . . . . . . . . . . . . . . . 99
26.1 Subproblem with maximal user-guidance . . . . . . . . . . . . . . 99

26.1.1 Go into the problem hierarchy with a particular model . . . . 99
26.1.2 Match a problem with the current model . . . . . . . . . . . . 100
26.1.3 Refine the problem for a given model in the knowledge base . 101
26.1.4 Transfer a selected problem to the worksheet . . . . . . . . . 102

VI Usecases

27 Enter an ZS4C site

28 Use the mathematics knowledge base

28.1 Browse the knowledge . . . . . . . . . . . . . . . . . . . . . . . . 108
28.2 Access other components of ZS4C . . . . . . . . . . . . . . . . . . 110

29 Do math on the worksheet

29.1 The student starts a calculation . . . . . . . . . . . . . . . . . . . 112
29.2 The student does a step in a calculation . . . . . . . . . . . . . . 115
29.3 Subproblem with maximal user-guidance . . . . . . . . . . . . . . 117

29.3.1 Find the matching problem for a given model . . . . . . . . . 118
29.4 The student calls KB-items from the worksheet . . . . . . . . . . 120

30 Authoring

30.1 Author the knowledge base . . . . . . . . . . . . . . . . . . . . . 122
30.2 Author the example collection . . . . . . . . . . . . . . . . . . . . 124

31 The example for reference

31.1 Description, formalization and modeling phase . . . . . . . . . . . 126
31.2 Knowledgebase and specification phase . . . . . . . . . . . . . . . 127
31.3 Interaction on the worksheet and the browsers . . . . . . . . . . . 129
31.4 The solving phase and subproblems . . . . . . . . . . . . . . . . . 131

VII Subprojects

32 SML-XML encoders

33 XML-design for math web-data

34 HTML-encoders for math documents

35 Integrated editor for math web-data

36 A selection-tool on hierarchies

36.0.1 navigation-tree . . . . . . . . . . . . . . . . . . . . . . . . . . . 141
37 XML-design for math examples 142
  37.0.2 layout-hints .......................... 142

38 MathML en/decoder 143

39 Integrate a formula editor into SWING 144

40 Co-operate in the development of a formula editor 145

41 Dinopolis-wrapper for IS4Cs math engine 146

42 Implementation of the basic classes 147

43 Worksheet 148

44 Dialog 149

45 User model 150

VIII Appendices 151

A List of terms used in the IS4C-project 152

B IS4Cs tactics 159

C Abbreviations 161

D Development environment 162
Part VI

Use cases
This document serves three purposes, it should

1. document internal discussions about crucial design questions during the early design phases

2. establish data for test cases at the end of the implementation phase

3. provide for entry-points to understand ZSAC for colleagues newly joining the ZSAC team.

The use cases - if not stated otherwise - refer to one example presented in 31 on p.126.
